In the first full year of the Jimmy Carter Administration much of the Carter Mystique has become known, and since the revelatative nature of the man has become known. For instance, his secret yearning to spend his post-presidential years in a quiet, white, stationary, coupled with his formula for instant Human Rights around the world has become policy. Reformers have always been convinced they knew what was best for everybody and it is not infrequently true that they were right. Some some in less dedicated sinners and back-sliders like you and me.

This Reform Program surfaced earlier in 1976 when Carter declared war on the myths of Three Martinis Lunch, which is a fact, and the fact that he charged it all up to expenses. The fact that the average Blahness Lunch does not include any such extravagance or outlay, accordin' to folks who should know. Jimmy is an elitin' Blahness Luncher, don't you see? (Blahness)

Cherokee, Williams
Red Brahman Female
Sale Set Feb. 18
 Cherokee, Texas — The "Best of the Breed" Red Brahman production sale will be held by Tom Dean's

Cherokee Ranch with Sloan & Jim Williams of Hungerford, at the Cherokee Ranch near here Saturday, Feb. 18. Lunch will be served at 12 noon and the sale will begin at 1 p.m.
 Selling will be 75 of the most highly selected Red Brahman females ever offered in a production sale. These females are the best the two ranches have to offer, and when it is considered that most of the females are carrying the services of Cherokee Negro 1/609, Navegante and McSaddle Rio Negro 496, the owners feel this is probably the best set of females anyone will ever have the opportunity to add to their herds.

Maine-Anjou Bulls Hold Top 1976-77 Averages

Maine-Anjou percentage-blood bulls hold top averages in 1976-1977 Performance Tests of the Indiana Beef Evaluation Program.

Twelve breeds participated in the Fall '76 and Spring '77 tests. Of these, only Maine-Anjou bulls had an ending weight per day of age over three pounds with an average overall of 3.02 pounds. Maine-Anjou also held top in average daily gain with 3.44 pounds.

The Fall '76 test has four 1/4-blood Maine-Anjou bulls on test for Dave Gerriott, Ox Valley Farms, Scottsburg, Ind. This performance test will end March 31, 1978, with the top 75% of each breed eligible to sell in the Indiana Beef Evaluation Program Sale April 13, 1978.

The Indiana Beef Evaluation Program began performance testing in 1976 to (1) promote performance testing of beef cattle; (2) complement on-farm testing.

Even in the Stone Age, when women wrote down their age, they guessed a little.

The American Maine-Anjou Association announces its Seventh Annual Membership Convention and Sale to be held Feb. 18-20 in Des Moines, Iowa.

This year's convention and sale is being held in conjunction with the Second Annual Iowa Winter Beef Expo. The Expo is already being noted as one of the prestigious cattle shows in the Midwest.

A busy Feb. 19 will begin with a membership brunch, open committee meetings and a presentation for women by Kay Brown, Curtis Breeding Service. The Annual AMAA Membership Meeting will convene at 1:00 p.m. that afternoon, with a full report to the membership and selection of new board members. Jim Reeves - 817/625-2763

pects poultry production will increase 4% to 6% above year earlier levels. Thus, Wood expects that despite the cattle industry's cutback in marketable beef for 1978, overall meat supply will be up 8% during the first half of 1978 and up 1% or 2% during the second half.

There is some reason for hope in the general economic forecast for 1978. Wood expects disposable personal income to increase 9% this year, and this, in combination with a small rise in population and an increase in employment will support demand for meat this year.

Wood's specific price projections for 1978: First Quarter: Choice fed steers, \$40 to \$42 per cwt.; choice, 600 lb. feeder steers, \$40 to \$42. Second Quarter: Fed cattle will start around \$40, trend higher to \$43 by year-end; yearling prices could climb past \$4.

Third and Fourth Quarters: \$43 to \$45 for fed cattle, no remarkable increase in feeder prices. So, Wood foresees a 1978 with less profit than any 1972; but, neither does he expect it will be as dismal as the "wreck" years of 1974-1977. He expects the market will have its ups and downs, periods of profitability and periods of loss.

He suggests the day may return when many producers can "hold" cows, bulls, replacement heifers and feeder steers for better market prices. "If you should find yourself with an inventory of feeder cattle and prices are depressed at the time," he suggested, "give serious consideration to feeding them yourself in a custom feedyard."

"There will be enough ups in the market to allow a good chance for produce; yearling prices could climb past \$4."

TO LOAD: Simply back up to bale, apply brakes to bale carrier; continue backing until loading arm falls over bale, then pull away, loading bale as you go.

TO UNLOAD: Reverse above procedure, stopping as bale rolls off carrier. Both loading and unloading accomplished from the driver's seat!

No special hook-up needed other than push-pull switch installed to activate brakes (12 volt). May be used either on pickup or on tractor; too small to handle bales on lift.
